125 YEARS AND COUNTING

As work continues on the Chapel extension, here's an *in situ* look back to an earlier building phase – the current Chapel under construction in 1894.

Taken from the centre of the aisle, looking back towards the west end, the two large wooden posts show where the entrance doorway now is. Behind are the two mullioned windows, now fitted with stained glass, which bring light into the vestibule.

Chapel stained glass – p5

Rowing Tank five years on – p6

Radley For Life – p8

ORs at Radley – p12

OR Sports – p16

Charles Towers-Clark (1983)

One of the invited guest speakers at the Radley-St Helen's-Desborough 6.1 Artificial Intelligence Conference held at the College on Tuesday 4th February was Charles Towers-Clark (pictured below right).

The author of *The WEIRD CEO*, he spoke to the assembled pupils on how the future of work (and life) will be affected by the rise in Artificial Intelligence.

Tom Milligan (2005) & Jon Tarcy (2007)

Tom and Jon (pictured below, third and second from right) once again trod the boards in Theatre as they returned to Radley on Wednesday 26th February to lead an Acting Masterclass for current boys.

Of particular note was the work on playing objectives and status, and the session provided much for the current crop of Radley actors to reflect on.

Hamish Mackie (1987)

At the end of January, the 6.1 Art students had the privilege of visiting the studio and foundry of the talented OR sculptor Hamish Mackie. Hamish has been sculpting animals in motion as a successful career since 1996, and has works in public and private collections around the world.

His studio was filled with incredible and life-like animal sculptures that grabbed your attention from every corner of the room. His pieces ranged from all manner of size and shape and each piece had a certain uniqueness to them which always made them stand out. At the foundry, we saw a full process of how each piece went from clay to bronze masterpiece. We saw a full casting with molten bronze as well as the creations of the moulds and refining techniques used.

Very many thanks to Hamish for giving up his time to show us his fascinating work and magnificent creations.

Henry Dixon (6.1)

ORs from *The Old Radleian*

After being featured in the 2019 edition of *The Old Radleian*, Radley were pleased to welcome David Taylor (1971), Oliver Steeds (1989) and James Pritchett (2001) back to the College to talk to the boys.

In February, Oliver visited the Radley Geography department and talked to the boys about the importance of the health of our oceans.

Both David (pictured left) and James (pictured right) were invited back by the boy-led Environmental Society to speak about important green topics.

David gave an Introduction to Green Politics, taking the assembled boys through the philosophy, policies and strategies that will create an ecologically and socially sustainable future. James spoke about the housing of the future and how new developments can help pave the way for future generations.
